## PROJECTS

### COCKTAIL=>

SPA that allows users to search for cocktails based off name, ingredient, or random. It then prompts users to search for the corresponding recipe.

**Technologies** = { React.js, CSS3, HTML5, Bootstrap, Cypress }

### MUSIC@

Oauth2 connects users to their Spotify account and populates the page with their followed artists. With a click of a button, users are able to bring up the tour information from the Bands In Town Api for each artist.

**Technologies** = { React.js, CSS3, HTML5, Oauth2, Cypress, Express, Node.js }
